

BLUE STAR POLICE SUPPLY SIZING INFORMATION

Please use our general sizing guidelines for ordering your products.

Cap Sizing:

Sizes: S/M (6 3/4" - 7 1/4")
L/XL (7 1/8" - 7 5/8")

Shoe/Boot Sizing:

Boot sizing is best accomplished by using a Brannock device by a shoe professional. Remember that athletic/running shoes can vary greatly in sizing. Professional footwear usually follows a true-fit process and you will likely wear the same size in most professional duty/tactical boots. If you are in doubt please place your socked foot on a sheet of paper and carefully trace the outline of your foot while standing erect and upright with all your weight on your foot. Then measure your foot length and width and email that to us.

Glove Sizing:

Using a cloth or flexible measuring tape, measure around your closed hand (fist) immediately below the knuckles and use that number for sizing. If you have unusually long fingers use the next size up.

USING THE SIZING GAUGE

Place your right hand with the side of your index finger against the white line.	6 (15.2)	7 (17.8)	8 (20)	9 (23)	10 (25)	11(28)	12 (30.5)	IN (cm)
	XS	S	M	L	XL	XXL	XXXL	US SIZE
	6	7	8	9	10	11	12	EU SIZE

Body Armor Sizing:

Please download the appropriate sizing form, have someone help you with your measuring and email or fax the sizing sheet to us. Hold the measuring tape snug but not tight to your body. Take all measurements with your arms relaxed at your side. Take all measurements with your duty belt and trousers on for best results.

Duty Belt Sizing:

Measure your waist loosely and add 2" to that measurement for duty belts.

Uniform Shirt Sizing:

Uniform shirt sizing is done by measuring your neck measurement at its widest point for short sleeve shirts. Add your sleeve measurement for long sleeve.

Collar: Measure around the fullest part of your neck. Ensure the tape measure is level all the way round and take the measurement with your index finger underneath the tape. This will ensure your collar is a comfortable fit, and not too tight.

Sleeve: Place your hand on your hip, with your arm bent at 90 degrees. Then have someone measure the distance from the center back of your neck (along your shoulder and elbow) all the way to your wrist.

Uniform Pants Sizing:

Measure around your waist without pulling the tape tight. Most trousers are sized by even sizing (32, 34, 36...) so round up to the next even number unless your measurement falls on an even number when measured loosely. Inseam is measured from your crotch seam to where you want your pants to stop. This is usually around 1" from the ground when wearing boots/shoes. When in doubt, round up.
